Embankment of the Nassim Road Extension.

Asks for authority to take from the Economic

Gardens about 4,000 or 5,000 cubic yards of earth required for  
the:-

D of G

Have you any objection?

sd. E.L. B. 26- I-07

Hon. Col. Sec,

I think this can be arranged as there is a hill opposite the termination of the road which could be improved by being levelled. It should however be a condition that the ground after removal of the soil should be properly sloped and turfed and that care should be taken not to injure the trees or plants in the vicinity. This Mr. Peirce in speaking to me says could be done. Since speaking to him about this matter however I have learnt with some surprise that the Municipality have applied for sanction to open a public road through this part of the Botanic Gardens and that the Government has approved of this being done as early as 1905, I have received no official communication on the subject and as there are grave objection to the proposal I should be glad to know previously to any excavation being commenced on this ground whether or no this work is intended to be carried out.

sd. H.N. B. 29/I/07

Municipal Office

Singapore, 26th January 1907.

Roads. 1215/c 6

Sir,

I have the honour to request permission to take from the Economic Gardens about 4,000 or 5,000 cubic yards of earth required for the embankment of the Nas-sim Road Extension.

2. The recent heavy rains have caused such an enormous loss of the material already deposited that it is necessary to have recourse to another source of supply and it is believed that the required filling can be obtained from the Economic Gardens which are convenient to the site.

3. The Municipal Engineer has submitted his proposals to the Director of the Botanic Gardens and I understand that the latter will raise no objection to the earth being taken if the ground disturbed is put in order after the operations. This the Municipal Commissioners will undertake to do.

I have etc

sd. E. G. Broadrick  
President  
Municipal Commissioners

The Hon'ble

The Colonial Secretary S.S.

Singapore

## Road

- 1 Road prop. to continue Nassau Hill extension to B 5 mile Road, really to Burtley prop
- 2) ~~Prop~~ Public roads a cross for ~~the~~ objected to, ~~the~~ special road built large expense ~~to~~ to avoid this
3. ground already planted
4. Structures ~~only~~ ~~lines~~. These would have to be destroyed in other places in garden for ~~them~~.
5. Cutting not less than 60 feet
6. Allocation of garden ground already to ~~the~~ objected to, ~~from~~ prop. re. museum. Unless to ~~allow~~ ~~of~~ ~~the~~ without consulting can give away land
7. Already 2 roads to B 5. One to ~~the~~ Nassau Hill road, this road ~~might~~ might save 200 yds to P. C. ~~with~~ ~~the~~ house
